Interactive E-Poster System – A Proven Digital Poster Solution for Conferences

2025-09-21 - Kiss Zsolt - Comment (1) - Web

Our **interactive e-poster system** has demonstrated its effectiveness at numerous national and international scientific conferences, as well as at leading corporate events. As an **innovative digital poster solution**, it delivers a **modern guest experience** and provides a compelling alternative to traditional printed posters.

The interactive e-poster system enables:

seamless **online submission and organizer review** of posters prior to the event,

high-tech e-**poster station displays** during the event,

an engaging and interactive experience for participants,

professional and convenient presentation tools for authors to showcase their work.

The system is complemented by **iPad kiosks with intuitive controls**, allowing attendees to easily browse posters and interact with content by rating or commenting. For presenters, the kiosks provide advanced presentation support, enabling them to focus on their audience and message while maintaining professional eye contact.

Fully integrated into the **rentiT event application and event platform**, the interactive e-poster system guarantees a unified, modern, and seamless **digital event experience**.

The interactive e-poster system is a proven, market-shaping solution for the digital transformation of scientific conferences and corporate events.

Discover our system here and request your complimentary consultation.
